

INTERVIEW AND PHOTOS

Some of the best and spookiest costumes this year!

We asked Mr. White to share a few words about Movember occurring this month!

Movember is a fundraiser foundation that began in Australia. It has been created to raise awareness about the health issues that are occurring within men. These problems often go dismissed and is not widely known by our society and community today. During this event, men will start at the beginning of November by growing out their facial hair, typically in the form of a moustache. By the end of the month, they will then shave their moustaches and raise awareness by seeing how much their moustaches have grown over the month of November. At the very least, the goal is to spark conversations about Men's Mental Health, Suicide Prevention and testicular and prostate cancer. Some men don't stop there though! Mr. White's Movember page raised over \$750. This month, he is hoping to surpass that goal and reach \$1,000!
